

PAROWAN VALLEY DISTRIBUTION SYSTEM

\*\*\* 1969 ASSESSMENT \*\*\*

\$ 950.00

FORWARD:

In compliance with a directive dated May 13, 1969, (attached) this new Distribution System is now under the Supervision of the State Engineer.

BASIS OF ASSESSMENT:

The Parowan Valley Distribution Report of 1968 compiled by Gerald W. Stoker, December 1968, Cedar City Area Engineer as revised by Donald C. Norseth, April 29, 1969, Distribution Engineer.

Using the revised data it is determined there was 24,078.27 acre-feet of water used in 1968 by the listed water users and \$ 950.00 divided by 24,078.27 acre-feet of water equals \$ 0.0394546619 cost of one acre-foot of water used by each listed user times that amount listed as having been used by such user in 1968 as his pro-rata share of such 1969 Assessment.

Parowan Valley Water Users

The State Engineer from 1967 has been reading the meters and checking the water use in Parowan Valley. In 1969 a general water users meeting was held February 6 to discuss the taking over by the water users of the distribution system. At this meeting a budget was set up and the mechanics of selecting a commissioner promulgated. We have appointed as your water commissioner Mr. Norman Day of Parowan.

Enclosed you will find an assessment notice that is your pro rata share to defray the expenses of your distribution system during the coming year. We would like to request prompt payment so that Mr. Day may receive his remuneration without delay.

We appreciate your cooperation.

Yours very truly,

A handwritten signature in cursive script, reading "Hubert C. Lambert". To the right of the signature, the initials "HCL" are written in a smaller, more formal script.

Hubert C. Lambert  
STATE ENGINEER

xxx 1969 Assessment xxx

\$950.00

## Forward

In compliance with a directive ~~of the the State Engineer~~, dated May 13, 1969 (attached) this new distribution system is now under the supervision of the State Engineer.

## Basis of Assessment

The Parowan Valley Distribution Report, 1968 compiled by Gerald W. Stoker, December 1968, Cedar City Area Engineer as revised by Donald C. Norseth, April 29, 1969 S/E Distribution Engineer.

## Calculation of Assessment

Using the "revised" data it is determined that there was 24,078.27 acre-feet of water used in 1968 by the listed water users and \$950.00 divided by 24,078.27 acre-feet of water equals \$0.0394546619 cost of one acre-foot of water used by each listed user times that amount listed as having been used by such user in 1968 as his pro-rata share of such 1969 Assessment.

*Re: Parowan Valley  
Distribution System*

Dear Mr. Reese,

Effective Thursday, May 1, 1969, the Parowan Valley Distribution System was placed in the "hands" and under the control of the newly appointed commissioner, Norman Day. This office has supplied him with the necessary materials and information to set up his account (water) books and will assist him until he is oriented to his new duties.

We have requested that he clear all expense vouchers and other related problems pertaining to this distribution system through our Cedar City Office. It will be necessary to observe his actions and procedures quite closely for the next few months.

If you have any questions on this matter please contact this office for assistance.

Sincerely yours,

Gerald W. Stoker  
Area Engineer
